

# Stella.

A collection inspired by industrial style and minimal design

Design by Stefano Pasotti

**WORLD  
PREMIERE**

Stella represents the latest and innovative proposal by Ama, a collection that combines the internal environment with the external one, where functionality meets aesthetics.

### Iconic and distinctive shapes

Developed with the cooperation of the Industrial Designer **Stefano Pasotti**, Stella line includes a series of proposals ranging from the washbasin mixer to the shower column. All the solutions have in common the design and the perfect fusion between two tubes that make Stella the protagonist of the environment as well as enhance the beauty and stability of the material from which they are forged, 316 stainless steel.
